

SUMMIT  
GROUP

# BUILDING TO NEW HEIGHTS

Summit Group is an experienced construction services company specialising in groundworks and reinforced concrete structures since 2016 with projects completed in London, Luton, Stevenage, Brighton, Oxford, Cambridge, and Bristol. With over 40 years' experience, Summit Group are focused on delivering high quality projects for our clients on time and within budget with an emphasis on excellent workmanship.

## ABOUT US

At Summit Group we use a variety of modern Formwork Systems, all our walls and Columns are formed using the Framex Wall panel system and where possible the Quickbox Column and Cores are constructed using the Slipform or a Framex jump system, for the Decks and Soffits we use a combination of the traditional Titan decks Topmax and Topec soffit systems.

## HEALTH & SAFETY

The directors of Summit Group are committed to the belief that Health, Safety and Environmental considerations receive the same importance as Quality, Production, and Cost within the Group. Our dedicated Health & Safety Manager carries out frequent site visits and inspections to ensure standards are being met and maintained.

# CLIENTS

**McAleer & Rushe**  
London, UK.

**Gilbert-Ash**  
London/Belfast, UK.

**HG Construction**

# OUR SERVICES

## GROUNDWORKS

We handle every aspect of site preparation, including excavation, drainage, foundations, and site infrastructure. Our expert team ensures a safe, solid foundation for all future works.

## REINFORCED CONCRETE

Specialising in complex concrete builds, we deliver durable, high-spec structures with the precision and reliability demanded by commercial and residential developments.

## CONCRETE PUMP HIRE

Our fleet of modern concrete pumps offers efficient, safe concrete placement for a wide range of site conditions and project scopes.

# ACCREDITATION

Our certifications highlight Summit Group's commitment to quality, safety, and industry standards, giving clients confidence in every project we deliver.
